

Group B

"Pogili, Subramanyam reddy" <sp946@njit.edu>, "Grullon, Robert" <rg352@njit.edu>, "Patra, Rupali" <rp582@njit.edu>, "Kankanala, Saikrishna Sai" <ssk92@njit.edu>, Rajil Ramesh Nambiar <rn264@njit.edu>, "Subramanyam, Vennela" <vs472@njit.edu>

Subramanyam Reddy Pogili :

Took the inputs from the team and spent a lot of time researching about the approach of implementing the algorithms to predict the datasets. I spent a lot of time over Skype, google Hangouts to discuss the viable solutions and implemented the randomforest, naiveBayes, and XGBoost models. Had the models tested by Robert to ensure the quality and performance. I've created collaborative report for the Final Project by taking inputs from the team and structured it in accordance with process flow.

Robert Grullon:

I have helped to organize the group meetings through google hangouts and then worked with the Powerpoint presentation. Also, I helped creating the group report in google Document. Also, I did some research on the Naives Bayes algorithms and then worked with the Naives Bayes Algorithms. I have tested the models to verify the quality and performance.

Rupali, Saikrishna, Rajil, and Vennela :

Did some research and provide our group with some inputs used while generating the reports for the final project. Collaborated in creating the google document and then helped with the powerpoint presentation.
